

# VALINA - TERMINAL

## DESCRIPTION

The perfect all-in-one unattended terminal representing the next generation payment experience in unattended payment terminals.

Compliant with the European Vending Association's guidelines, VALINA can be installed in kiosks, vending machines, parking meters and can also be used for similar applications. Furthermore, the Android-based platform supports value-added services and third-party business applications. The convenient colour touch display and the attractive user interface allow the customer a convenient and smooth payment process.

## COMPATIBILITY

VENDING MACHINE
